

Applicant : Andrew Golding et al.

Attorney's Docket No.: 10984-536001 / P264

Serial No. : 09/902,422

Filed : July 10, 2001

Page : 2 of 15

Amendments to the Specification:

Please replace the paragraph beginning at page 5, line 17 with the following amended paragraph:

The Internet and the World Wide Web can be viewed as a collection of hyperlinked documents with search engines as a primary interface for document retrieval. Search engines (e.g., Lycos®, Yahoo!®, Google®) allow the user to enter a query and perform a search based on that query. A list of potential matches is then generated that provides links to potentially relevant documents. Search engines typically also offer to the user some form of taxonomy that allows the user to manually navigate to the information they wish to retrieve.
